CSS Platinum Crew Check.

Do you conduct employee background & security checks?

Superyachts and Maritime vessels are prime targets for criminal organisations.

A company's greatest strength and liability are their people. Crew and employees have a trusted role, they ultimately form part of the family and have access to the internal working of a vessel, the systems and sensitive information.

It's vital to check for indicators of any unwanted activities that could result in risk to safety, security or reputation.

Intelligence driven, AI and Dark web background checks with Crew Check

CSS Platinum's Crew Check service uses industry-leading intelligence sources and AI tools to provide a complete investigation across all layers of the internet.

Crew Check utilises millions of global data feeds across open source and close sourced data systems; a full analysis and risk report provides a 360-background check on an individual – highlighting any risk and providing mitigations on improvements to support the individual and the organisation.

Millions of data feeds checked → Dark Web searches → One risk report provided → Recommendations and mitigations
What would Crew Check provide you?

Crew Check enables businesses to understand and manage the risks that their people present through their online digital footprint. Crew Check performs deep and comprehensive web and data checks across millions of data feeds into one report providing recommendations and mitigations on any security risks.

To be reviewed

Nothing found

Alert

- ✓ Profiles of crew and employees
- ✓ Improved regulatory compliance
- ✓ Greater employee retention
- ✓ Protection for all parties
- ✓ Validation for both employee and employer
- ✓ Report provided 10 days from assessment
- ✓ No hassle, outsourced process to cyber-security specialist
- ✓ Build your cyber-security strategy

Criminal background checks are not enough

A criminal background checks is limited due to the transient lifestyle of crew - moving from country to country is standard due to the nature of the job. A criminal background check will provide information around any criminal acts in the prospective employees' country of birth but does not cover time spent travelling and working in other countries.

Utilise the power of AI Technology

AI technology can provide comprehensive checks across millions of data feeds including the dark web. CSS Platinum deliver one report in a matter of days from $125 per candidate* which also includes recommendations and mitigations of any security risks. Protect what is most valuable to you.

✓ Security   ✓ Protection   ✓ Trust   ✓ Compliance

What information will Crew Check analyse?

Crew Check will identify information that is available or for sale, about a crew member across the internet, including all social and news platforms. Crew Check provides validation on data, providing analysis and reporting on any risks.

Dark Web Checks	Dark Web Marketplace Checks	Credit Card Fraud Checks	Data Dump Searches
Social Media Platforms	Impersonated Data	News & Media	Scan of Dark Web Forums
