

January's edition: Looking back at 2021 and forward to 2022

Many people have called 2021 the "year of the software supply chain attack". A series of high-profile organisations were impacted with zero-day attacks, phishing or unpatched security bugs targeted through supply chains.

Our 2021 webinar series demonstrated what a supply chain security hack could look like when our own notorious cyber villain 'Cyber McNasty' deceived a yacht management company by targeting unprotected areas of their supply chain. [Click here](#) to watch back the webinar with our partners ACREW, Darktrace and IYBA.

2021 also saw a continued increase in the volume of stolen records and data. We live in an era of digitalisation; the amount of data increases every year, and with it, so do the security risks.

As a result, cybercriminals are now stealing higher volume, less secure data on a global scale.

Cyber-Bytes Glossary

Is your vessel or organisation at risk? CSS Platinum provide a Yacht Cyber Security Audit to assess any security vulnerabilities and address them fast!

Yacht Cyber Security Audit provides:

- Complete on-board evaluation
- Security Risk Assessment Report
- IMO Cyber Compliance Plan
- Workshop with Cyber Security Experts
- Risk Management Policies
- Cyber-Awareness Training
- Incident Response Plan

For further information contact the CSS Platinum team at support@cssplatinum.com

Your own personal security solved with **Cyber Bodyguard**

Individuals are more likely to be targeted in our superyacht and maritime community. Most people take security for granted; we believe our devices, IT systems, and procedures are unique and have a quality protective shield inbuilt, protecting us from criminals.

The reality is very different. We leave ourselves vulnerable because we think 'our' data is useless to the bad guys. The more critical your data is, the more likely your security will be penetrated. In the last 5 years, billions of records have been stolen, and that volume of data will continue to increase as thieves steal in bulk and sell it on the dark web with high net-worth individuals most at risk.

CSS Platinum offer individuals their own personal cyber security protection services with Cyber Bodyguard. For more details, go to <https://cssplatinum.com/cyber-bodyguard/>

Protect yourself with **Cyber Bodyguard** from CSS Platinum

CSS Platinum are delighted to launch Cyber Bodyguard, a service that provides complete security and protection for individuals.

Understand it

Fix it

Maintain it

Respond & recover quickly

CSS Platinum expansion in 2022

2022 is also bringing further expansion at CSS Platinum, with a number of recruits joining our global team!

With new faces joining our technical and delivery teams in the UK and US this coming month, it's an exciting time here. We also have new roles that have opened up in our Cyber Security Consultancy team to work with Superyacht and Maritime organisations on their Cyber Security strategies. For further details, please email support@cssplatinum.com
